

## Protect Your Information

In today's world, your documents can be accessed any place, any time, on any device. And without the right security, by anyone.

The challenge: protect all of your documents all of the time on any device.

The Solution: Doc-Secure can protect your information across all devices and networks, both at rest and in transit. Doc-Secure works seamlessly across local hard drives, e-mail and cloud storage.

Since it is easy for anyone to access your files from anywhere, it is just as easy for you to protect your files everywhere.

## Innovative Solutions for Modern Business

Based in South Florida since 2011, Doc-Solutions is a provider of services and solutions to meet your custom software development, integration and support needs in an assortment of industries.

In partnership with the latest and most versatile software solutions, our team has worked with a variety of international industries in the application and customization of document management, workflow and security solutions.

*Process, Secure and Manage your Documents*

## Digital Rights Management & Protection For Your Documents

## Encrypt & Protect Sensitive Information

## Federal, State & Industry Legal Compliance

## Full Audit Capabilities

## Cost Effective Solution

## Enable Business, Enable Success

Maintain control of your documents and information inside and outside of your network.

Never let security concerns put an end to novel technology.

However, the ability to control granular access policies on your documents provides you with more flexibility and freedom. Adopt outsourcing, cloud services and mobile technologies without jeopardizing your information security.

Enable success by adapting to change.

## Features

**Enhanced Access Control:** Manage access and usage of your files by device, user, group, time, functionality and network

**Multiple Authentication Types:** Active Directory, Internal, OAuth (Facebook, Microsoft, Google)

**Supports Two Factor Authentication:** Add an additional layer of security and access control by implementing application based Two Factor Authentication

**Multiple layers of encryption:** Doc-Secure utilizes multiple layers of encryption to secure your document at rest

**Realtime tracking, auditing and access control on local and remote networks:** Encrypted documents that are no longer required can be expired on demand or with pre-determined dates. Disabling your information is easy and quick.

**Outlook Integration:** Protecting an e-mail attachment can now be as simple as sending one. By clicking the "Doc-Secure" icon in the Outlook ribbon, the attachments that you send can now be protected

### Compliance and BYOD

Allow your documents to be being accessed on corporate and personal devices and laptops. By enforcing permissions, your compliance is guaranteed, even when accessed on personal devices. Keep your information protected and your systems compliant while allowing groundbreaking enterprise mobility and BYOD adoption.

### Expiring Documents & Subscriptions

Prevent documents from being opened beyond their expiry date (Estimates, Contracts,...). Only allow access to documents while subscriptions are active.

### Use the Cloud, Stay in Compliance

Protect your documents while utilizing both public or private cloud services and remain in compliance with policy, procedure, legal and regulatory requirements. You can now use innovative technologies to develop your business without being hindered by compliance issues and security threats.

### Innovative Data Governance and Compliance Control

The process of securing your files begins when you protect a file and share it with others. Any document protected with Doc-Secure reports usage to the Doc-Secure Rights Management Server. The usage of your files are immediately tracked, enabling you to be aware of when, where and who is viewing your documents. Customizable reports are available within the Rights Management server, and can be exported and scheduled. This information can be made available to both internal and external auditors to assist in policy, procedure and regulatory compliance..

### Extend Policy, Procedure, Legal and Regulatory Compliance Beyond Your Network

Enforce internal policies and procedures as well as governance and compliance policies beyond your network as security and permissions travel with the document. Doc-Secure not only permits you to decide what functionality specific users receive, it also enables you to monitor any encounter with your information from any device.
